Using the Learning Abroad Program Search

Overwhelmed by the number of programs in our online program search? We can help! The program search offers several features that will help you narrow down your search. To conduct a general search, take the steps below.

1. Visit [www.learningabroad.utah.edu](http://www.learningabroad.utah.edu) and click on the Search Programs link.

2. At the top of the screen, is a series of dropdown menus. These menus allow you to limit the list of programs based on criteria. Select the criteria you would like to use from the dropdown lists provided. Note that you can apply multiple filters at the same time to further limit your search. Some of the filtering options are self-explanatory, but there are a few that merit clarification.

   - **Provider**- The provider filter allows you to search programs by the organization that coordinates the program. This can be helpful to students who receive scholarships that can only be applied to certain program providers. Please note that, even though U of U is one of the options, all of the programs in our database have been approved by the Learning Abroad Office.

   - **Field of Study**- This menu allows you to filter the list based on the subject a student wants to study.

   - **Searching by College or Department**- The Field of Study menu also allows you to sort programs by College. To sort programs by College or Department, select the relevant department in the dropdown menu. In addition to Colleges, you can also search by Department of Language and Literature, David Eccles School of Business, and School of Medicine. *Please note that the programs sponsored by the Department of Language and*
Literature will not be listed under College of Humanities. These programs are listed under Department of Language and Literature.

- **Term**- This dropdown menu allows you to limit the options by the academic term that interests the student.
- **Language of Instruction**- If the student is interested in taking classes in a particular language, this filter will sort programs by the selected language.
- **Destination**- This option allows students to sort programs by host country.
- **Type**- This will filter the list of programs by the type of program you are interested in. The type of program selected by a student impacts the cost structure, courses available, and housing options. For information on what each type of program is, review the Prezi on our website.
- **Keyword**- The keyword box allows you to type in key words to narrow down the list.

3. Click the Apply Search button to activate the filters. A list of the programs that meet your criteria will be generated.

4. The list generated meets the criteria you entered in the filters. To view the details of a particular program, click on the magnifying glass next to the program name.
